#### **DETAILED ACTION**

### Response to Amendment

The amendment filed on 12/19/01 has been entered as Paper No. 8.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Turner et al (EP 0465698) in view of Egelhof et al (US 6,159,341) and in further view of Huovila et al (US 6,270,624). Turner discloses a method of making a multiply paper comprising of two web former units wherein the face of a second ply has a high amount of pulp stock fines in order to effect a greater ply-bonding affinity with a first base ply. While Turner is silent disclosing that the second ply is made from multilayer headbox. Examiner takes Official Notice that providing a second ply via a multiplayer headbox is known knowledge as evidenced by Egelhof. Egolhof teaches that a multiplayer headbox (26) may be used to provide a second ply. Egelhof is silent disclosing the stock feed system of the headbox. However, Houvila discloses stock feed system for a headbox having a flow of fresh stock being divided into three component flows (5a-5c) wherein an admixture is supplied to the component flow that would make up the outer layer/face before pump (19a1). Houvila's headbox provides for better control of the

Art Unit: 1731

desired chemicals and fillers to be added to a web and obviates additional storage facilities due to its single fresh stock feed system. At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to use Houvila's multilayer headbox with Turners method of making multiply paper in order to provide a better feed control of admixtures and reduce storage facilities.

2) Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Turner et al (EP 0465698) in view of Egelhof et al (US 6,159,341) view of Huovila et al (US 6,270,624) and in further view of Grossmann et al US (5,607,555). Turner is silent disclosing how the first ply is made. However, Examiner takes Official Notice that providing the first ply of Turner by a headbox and gap former are well known in the art as evidenced by Grossmann et al Figure 1. At the time the invention was made, it would have been obvious to a person of ordinary skill in the art to have provided Turner's first ply via a headbox and a gap former since Examiner takes Official Notice that providing a first ply by a headbox and gap former would have been mad by a well known method as evidenced by Grossmann et al.

## Response to Arguments

Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carlos Lopez whose telephone number is (703) 605-1174. The examiner can normally be reached on 8am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Silverman Stanley can be reached on (703) 308-3837. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-7718 for regular communications and (703) 305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0651.
